

C. Steinweg - Minor Metals

Who we are

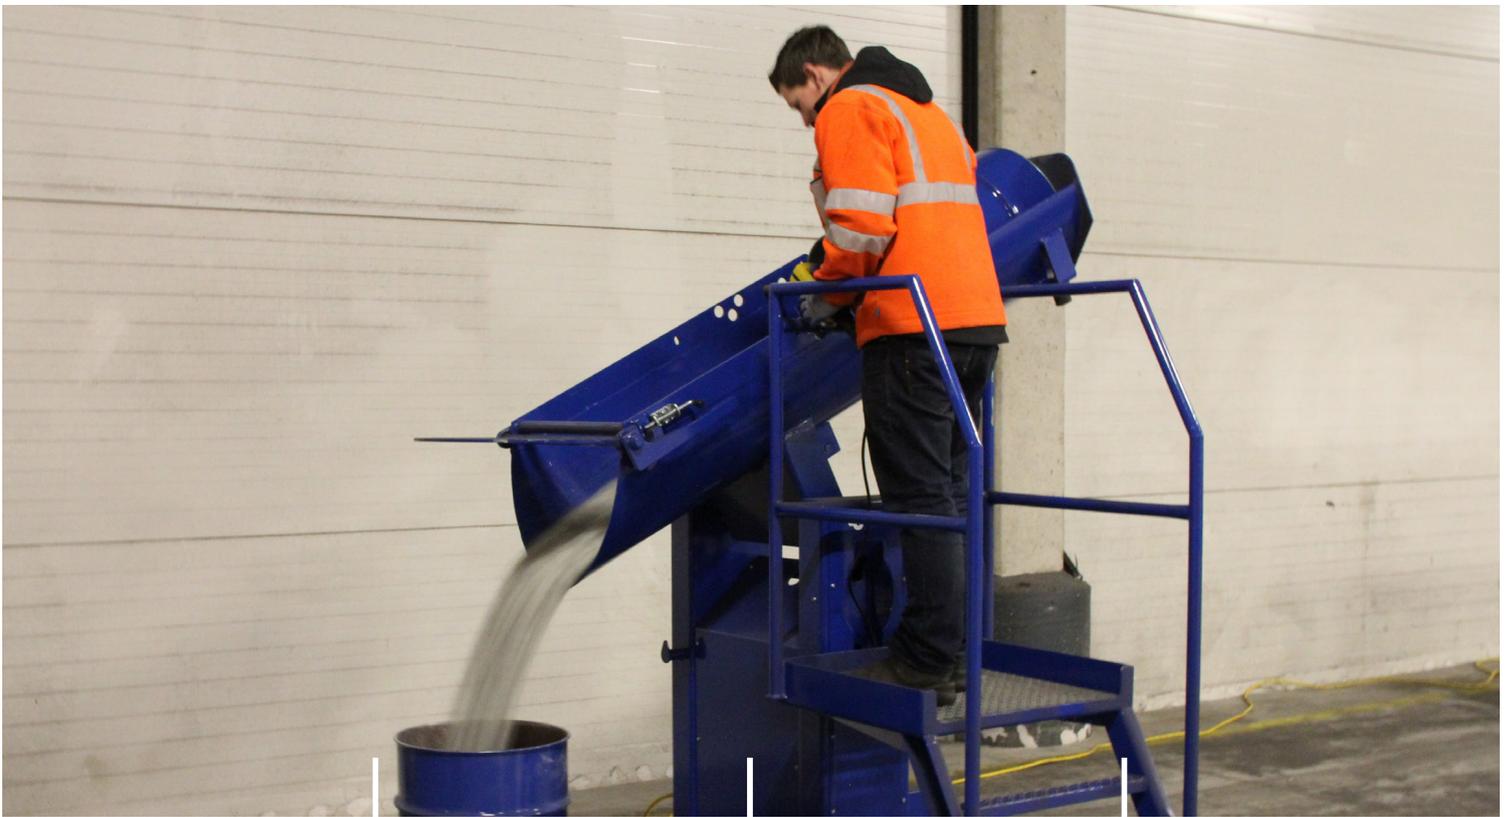

Since 1847 when C. Steinweg was founded in Rotterdam, the organisation has grown into a multinational logistics company that offers warehousing and forwarding services in various locations in Europe, Asia, Africa and the America's. As a preferred warehouse for the minor metal community, Steinweg is and has always been close to minor metal producers, traders and consumers and is truly specialized in the handling of these valuable commodities.

At many of the worldwide Steinweg operations we handle Minor Metals and related products. Many of these are MMTA and LME approved locations. These valuable goods are stored in our warehouses with the special care required for these products. This includes experience in the area of "in warehouse releases" and knowledge of the products handled. All on basis of procedures required to manage the chain of custody for your cargo.

We are a pure logistics service provider and do not trade in minor metals. We add value through the supply chain by efficient cargo handling and solid logistic solutions. In addition we act as the trusted warehouse keeper in collateral financing agreements and are a recognized partner to banks that are active in trade and commodity financing (TCF).

Discretion, reliability, neutrality, confidentiality and security play vital roles in conducting our business. Because of this C. Steinweg is a truly global company that confronts the challenges of the 21st century.

C. Steinweg was founded in 1847 in Rotterdam by Constantin Steinweg and has always remained a privately owned company. During these years we developed into the multinational logistics group we are today while maintaining our status as independent company.

ISPS

What we offer

Warehousing: one of our core activities is the warehousing of a variety of commodities. C. Steinweg's facilities are fully recognized by major international banks and insurance companies. With the cargo documentation provided by us, we facilitate financing and insurance of stocks held in our custody. Our warehouse-receipts/warrants and releases are internationally accepted to facilitate "in-warehouse" financing and insurance of stocks held in our custody. C. Steinweg stores for both trading companies as well as producers from around the globe.

Forwarding: apart from safe inside storage Steinweg can offer global forwarding as well as inland distribution by every possible means of transportation. We take care of door-to-door distribution by containers, trucks (both FTL and PTL) or airfreight and act as forwarder, warehouse operator or logistics provider on our customer's behalf.

Repacking: Most of our facilities that are specialized in the handling of minor metals also have the experience and equipment to arrange proper packing and repacking of these products. We can repack, repair or recondition damaged goods. We can arrange for repacking from original packaging into drums or bags depending on the commodity and customer requirements, with marking as requested.

Products: the products we handle include: Cobalt, Molybdenum, Titanium, Antimony, Magnesium, Manganese, Vanadium etc

Quality: obviously we abide by various types of legislation related to handling, storage and transportation. We maintain safe working conditions which are controlled by our Safety Control System, follow regulations according to the Health & Safety Act and provide security maintained by the regulations of ISPS, C-TPAT. Our Management System is certified according to the Quality Standards of ISO 9001 and we are AEO certified in our EU locations. C. Steinweg has an up to date inventory system and experience with barcodes. We see it as our obligation to take the utmost care of your goods while stored with us.

Accreditations: some of our selected warehouses are approved for the storage of Cobalt as traded on the London Metal Exchange (LME) and some are approved by the MMTA. Our warehouses are specifically suited for storage of minor metals. All the warehouses are in very good order and up to the high standards of the above institutions. Special vaults and lockers are available for high value materials.

Why we are different

Steinweg offers all kinds of services similar to what other international logistic companies offer. This includes stevedoring, warehousing, distribution, forwarding, shipping & chartering, (re)packing, handling and processing, customs clearance, logistics control etc.

The way in which Steinweg is different from many other metal logistic companies is that we are truly neutral and not related or owned by any trading company or metal producer. Our history as a neutral specialist in commodity exchange warehousing (LME, ICE/NYBOT, CME/COMEX, SMX etc.) has resulted into Steinweg's excellent reputation when it comes to collateral management agreements and other forms of in-warehouse financing.

The function we have is that we are equally close to traders, bankers, producers and consumers and take a truly neutral position in the logistics process. And simply offering the very best of service and maintaining the high level of confidentiality that the business of our customers requires.

Where we are

Steinweg's global head office is in Rotterdam. From here we have over the years developed into a truly worldwide warehousing network for the benefit of our customers.

Our MMTA approved warehouses are located in Antwerp, Baltimore, Rotterdam and Shanghai, while Antwerp, Baltimore and Rotterdam have been approved by the London Metal Exchange for the storage of Cobalt.

Please find on the next page a complete overview of the Steinweg office network. Not all these locations are able to offer warehousing services for the highest valued minor metals, therefore we advise you to contact us prior to shipping your cargo to these locations.

Where we are

We are active in a large number of worldwide locations with our own warehousing and forwarding activities. The complete overview is as follows:
